

ENVIRONMENT POLICY

IPI Australia offers complete productivity improvement solutions and support services in the mining, agricultural and resource segments while complying with all relevant environmental laws and regulations.

At IPI Australia we are committed to the continual improvement of our systems of work, equipment, technology and strategy to maintain high standards of environmental care.

IPI Australia is committed to long term sustainable development and providing products and services that can be used in a way that minimises harm to the environment.

IPI Australia will ensure:

- a) Aiming to comply with all applicable energy and environmental laws and regulations and other requirements.
- b) Proactively identify environmental hazards, assess their risk to as low as reasonably practicable. Any activities that impact on the environment will be monitored and audited.
- c) All people working for or on behalf of IPI Australia will receive adequate information, instruction and training on environmental policies, procedures and practices. We will encourage the active participation of all employees in reducing any environmental impacts.
- d) Preventative actions and appropriate controls are implemented and maintained to prevent spills, to recycle resources and to ensure the efficient use of energy to reduce greenhouse gas emissions.
- e) IPI Australia's Mission and Values are incorporated into the fabric of what we do.
- f) IPI Australia is committed to comply with the requirements of the Environmental Management Systems AS/NZS ISO 14001:2016
- g) New methods and technologies are evaluated for their effectiveness and usefulness in conserving resources, minimising waste, improving work processes and protecting the environment.
- h) The protection of the environment is the responsibility of every person at IPI Australia. IPI Australia will encourage suppliers and contractors to adopt principles in their operation that are compatible with this Environmental Policy.
